This catalogue presents a glimpse of how the Department of Science and Technology (DOST) and the Philippine Textile Research Institute (PTRI) through the Small Enterprise Technology Upgrading Program (SETUP) have encouraged and assisted the micro, small and medium enterprises (MSMEs), particularly those in the Gifts, Decors and Housewares (GDH) sector, in adopting technological innovations to enhance operational efficiency and boost productivity and competitiveness. The services extended include the transfer of the developed technologies of the PTRI and other research agencies, the conduct of consultancy and technical services, the mechanization of production processes, and the introduction of new designs and concepts.

Featured in this catalogue are various products and manufacturing processes of 50 MSMEs, nongovernment organizations (NGOs) and cooperatives which have benefited from the S&T interventions, as recommended by the PTRI and the DOST regional offices. Each featured entity has a brief description and profile. Various type of assistance from SETUP and the Institute and the impact created are briefly presented. It also contains a product index.

This compilation will serve as promotional material for our participants in the GDH sector to enable them to further reach out to more buyers both in the local and foreign markets. The selected firms, featured as models of successful enterprises, will likewise give the reader a picture of DOST s contribution to the industry in terms of the technologies that various agencies under it and network members have generated and the science-based advocacies that it has championed.

On the occasion of the DOST s 50th year, this material is being issued in appreciation of the support given to the Department by our partners in government and private sector.

ESTRELLA F. ALABASTRO, PhD

Secretary, DOST

MESSAGE

This 2008, the Department of Science and Technology (DOST) has reached the 50th mark of its existence.

To give more meaning to this year's celebration, it was deemed a golden opportunity to put out a catalogue of Philippine handicraft products that are classified as "Gifts, Decors and Housewares" or GDH.

We want to showcase these products to best illustrate the fusion of science, innovation and art, as well as show how the micro, small and medium enterprises (MSMEs) have made S&T work for them.

Featured in this catalogue are 50 companies which have availed themselves of DOST's assistance through its Small Enterprise Technology Upgrading Program (SETUP), as well as several technology trainings from the Philippine Textile Research Institute (PTRI), and various technical assistance from DOST regional offices. A composite of their product lines are shown which includes baskets, shell craft, shades, metal craft and other decorative articles. Many of these are made from natural fibers and are converted into textile materials, and items, such as place mats, table runners, throw pillow cases, barong materials, blinds, bags and ladies' accessories.

The companies featured in this catalogue are just a few among the many MSMEs being assisted by the DOST and its agencies in several ways. These are representatives of the handicraft sector which have attained a leading edge through the adoption of DOST's technologies, and other S&T innovations to create world-class products.

Through this catalogue, the DOST hopes to promote the GDH sector's export-quality products and to advocate the use of science-based technologies in further improving the industry sector.

CARLOS C. TOMBOC, PhD
